Hi Nina

Op twee van die foute

1. BE180028 is foutiewelik gekanseleerm sy is geinspekteer en moet heringestel word.
2. BE170222 is geslag en moet verwyder word. Die keuring was nie op hom nie, maar op BE180202. Sy punt moet dus op BE180202 aangebring word. Ek heg die kommunikasie aan na die keurder om hierdie fout reg te stel.

Dankie

Jaco eloff

Subject: Dier Redigeerverslag

Dear Breeder

The Logix system is a very refined system and many checks and tests are done before being incorporated into the system. Logix's aim is to ensure that all biological and breed standards are adhered to and thus ensure that reliable (clean) data is recorded for further use in Genetic evaluations. This results in Editing lists, also known as "Error lists" being generated after the clerk cannot resolve the issues, and the breeder must be contacted to obtain further information to record the transaction fully.

Attached is your herd's Editing List and you are kindly requested to reply on every transaction. If such a transaction is not resolved within two (2) years, the transaction will be deleted from the system and you will have to resubmit it. These lists will be sent to you on a more regular basis for the purpose of improving our services to you.

We look forward to hear from you. Please sent feedback to the person from whom this email has been sent and not to Logix.

Geagte Teler

Die Logix stelsel is 'n baie verfynde stelsel en baie kontroles en toetse word op 'n rekord gedoen alvorens dit opgeneem word in die stelsel. Logix het ten doel om te verseker dat betroubare (skoon) data opgeneem word, wat voldoen aan biologiese sowel as rasstandaarde vir verdere gebruik in Genetiese evaluasies. Dit veroorsaak dat sekere redigering eers gedoen moet word voordat 'n rekord aanvaar word in Logix. Om hierdie rede is daar 'n Redigeerlys, ook bekend as 'n "Foutelys" wat die redigeerklerk nie kan oplos nie en die teler moet gekontak word om verdere inligting te bekom om die rekord volledig op te neem.

Aangeheg is u kudde se Redigeerlys en word u versoek om asseblief dringend aandag te gee aan elke transaksie. Indien so 'n transaksie nie binne twee (2) jaar opgelos word nie, sal die transaksie van die stelsel verwyder word en sal u weer die transaksie moet indien. Hierdie lysie sal op 'n meer gereelde basis aan u gestuur word met die doel om die diens aan u te verbeter.

Daar word graag van u verneem in die verband. U terugvoering moet asseblief gerig word aan die persoon wat die epos aan u gerig het en nie na Logix nie.

Groete

Hi Derick

Hope you are keeping well.

You will remember during the inspection of the bulls, there was a mix up with one of the numbers of the bulls. We changed the original inspection list to adjust the numbers.

It seems now that we made a mistake with one of the bulls, BE170222. This number must be BE180202. On the number you will see the "20" cut was missing.

I am attaching:

1. The original inspection list that was signed off
2. The adjusted one that needs to be signed, removing BE170222 and replacing it with BE180202. The bull that was actually inspected was BE180202.
3. The cancelation list of BE170222, who was slaughtered earlier this year.

My apologies for the inconvenience.

Kind Regards

Jaco Eloff
