Hi Christine,

0695128

Attached is the list of animals purchased from Martin Joubert that comprised the Full Blood Boran herd.

As per the attached spreadsheet, some of them need to be reinstated and others need to be registered. Christopher inspected these animals on the 02/02/2024 and the inspection notes are on the spreadsheet. Once the herd has been reinstated, then an inspection list can be generated and Christopher can sign the necessary SA Studbook paperwork or whatever else is required from a procedural perspective.

Most of the herd are embryo calves and I have attached the schedule O forms to this email. I have also attached the Unistel report which I received from Martin. The outstanding DNA work has been sent into Unistel and we await their report. Once the report has been received, we will update Logix accordingly (provided the animals have been reinstated / registered)

Please let me know if there is anything else required from me in order to get these animals back onto Logix and into the Boran breed.

As agreed, I will pay for the fees and penalties associated with this process.

Thanks again for your help with getting this herd back on track.

Kind regards,

SIMEON HURWITZ
