Good day!

Thank you very much for your assistance.

Went to the farm to see the animals, I've picked up that SPD 20 - 006 is indeed a male and not female as recorded.

May you please assist in correcting this error!

Thank you so much for your assistance again

Kind regards

Good Day,

I am very well thank you so much.

I update your weaning weights however SPD 20 13 weaning weight is too low, the weaning weights must begin at 85 kg.

SPD 15 011 is cancelled on 26-APR-19 /Insp-Rej at inspection(2) the calves SPD 20 18 and SPD 20 19 is on PZ 10 33 record as twins, can we keep it this way because of SPD 15 11 that is cancelled? and I can not reinstate an animal that was Rejected at inspection.

Thank you so Much.

Warm Regards.
