Hi Michelle,

I am going through my records and it seems the problem with the registration of 10 0003 has yet to be resolved.

Just a reminder about her story....

We had an old cow called 10 0003 who was registered a while ago and we cancelled her registration.

Reg	Status	ID No	M/F	Dam	Sire	DOB	BW	PW	WW	12M	Milk	CV	Inspection	Comments
x	dead	10 0003	F	0403	PAL 050052/85	07/09/2010	39	186	0	0			Y/FB	dead,reg cancelled 22/05/19

We then subsequently came across a cow on our farm that had slipped into the commercial herd but was in fact a pedigreed Hereford animal. Her records were confused with that of the original 10 0003 because her number in her ear tag was x1003 :(

Please could we keep the original 10 0003 as dead and thus her registration cancelled, and then process the registration for the new animal which was numbered x1003 and register with the number 10 1003. Does this all make sense???

Below are the details of 10 1003 and her progeny.
