Hi Lea
Nog 'n regstelling asseblief.

- Cow GT20003 was mistakenly registered to have given birth to TMR24006 and that was a fault on my side, it didn't give birth at all. **KANSELLEER ASSEBLIEF HIERDIE KALF.**
- Cow GT20029 was mistakenly registered to have given birth to TMR24007 and that was a fault on my side, it didn't give birth at all that calf belongs to GT19099
- Calf TMR23031 was wrongly allocated to GT19099 as per above it is a dam to TMR24007.

Kalf TMR 230031 moet asseblief gekanselleer word - ma is kommersiele koei.

Kalf TMR 240007 se korrekte moeder is GT 190099.

Dankie en mooi dag.
Groete

- Cow GT20029 was mistakenly registered to have given birth to TMR24007 and that was a fault on my side, it didn't give birth at all that calf belongs to GT19099
- Calf TMR23031 was wrongly allocated to GT19099 as per above it is a dam to TMR24007

Good Morning Tumelo
Thank you for the return e-mail.
No the calf works out with the time that the cow ran with the bull mentioned.
If you wish us to assist with the recording of the calf let us know or will you do your own recording on the Logix system?
Please advise if you require any assistance.
Kind regards

Good afternoon Evelyn,

It gave birth yesterday to a 22kg bull which look more like polled calf but time will tell, the other thing is the calf looks like it arrived before it's time

Kind regards

Good Afternoon Tumelo
Thank you for the enquiry.
If we look at the cow's Progeny listed on Logix it indicates that she ran with the bull PER 190006 in June 2023.
Let us have the birth date of the calf born and we can then see if it coincides with this mating.

Kind regards
